Gold ready-to-wear

Lingot d'Amour debuts, mini pret-à-porter "lingots"

If up to now an "lingot" was only the raw material to be sketched and forged, now it is no longer the case. Because around the essential and clean form of the "lingot", in 999.9 pure gold or 999 pure silver, the designers Sonia dello Strologo and Ilenia Milesi have built an entire collection, Lingot d'Amor. Real "lingots" to wear, reproduced in miniature and in slim format, a few pieces with a decidedly original design, offered in male and female versions - earrings, chains, rings and bracelets for her, cufflinks and pins for him -, and with different platings, from pink gold, yellow gold to burnished. A product that promises to stand out for its uniqueness, with the plus of being 100% made in Italy, made by Italian goldsmith workshops.
